# Software Certifications Survey

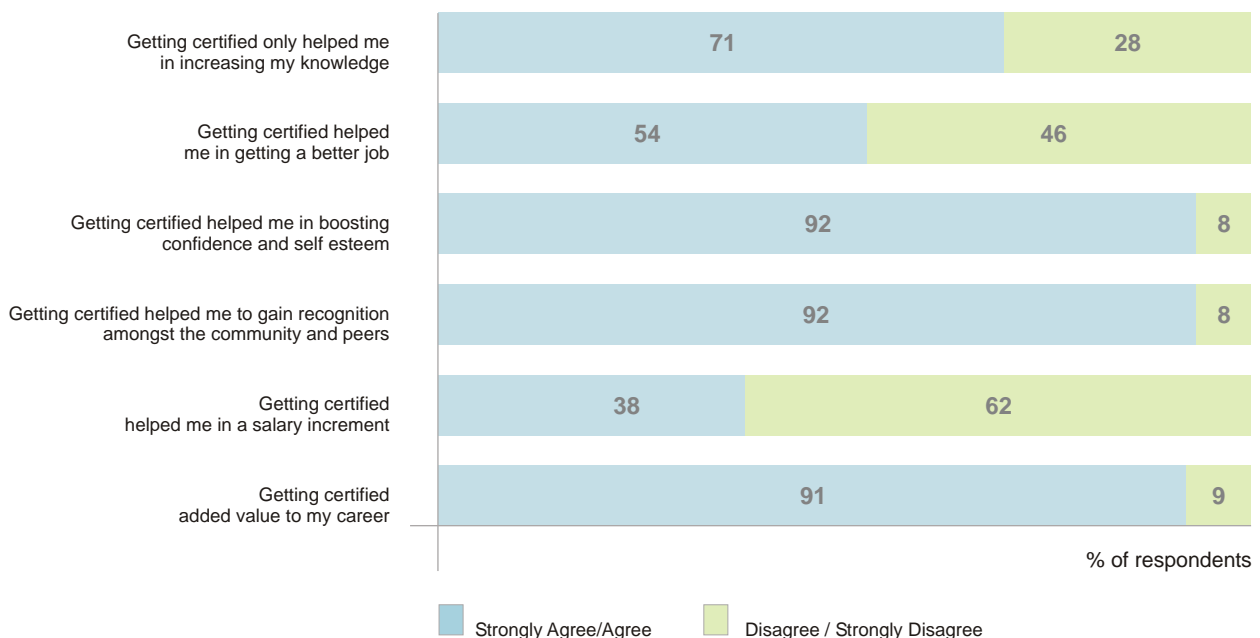

The Software Certifications Board has over 40000 certified professionals worldwide. From this community, a survey was conducted amongst 3500 active certificate holders. This process was aimed at understanding the value certification drives to an individual and how these certifications help them in building their careers and its additional benefits.

The survey also dwelt deeper in understanding finer aspects and feedback on the Common Body of Knowledge, preferred mode of learning, the software certification outreach amongst various other aspects.

The web is a very potent tool and hence we reached out to the certified population using this medium. The online survey was open for a period of 30 days and all feedback was stored in a central repository. The raw data was further analyzed and some of these findings research have been highlighted below for your reference and acknowledgment.

## Exhibit 1 How Software Certifications has benefited the professionals

Most certified professionals believe that the certified title adds value to their career, helps gain recognition amongst peers and boosts confidence and self esteem.

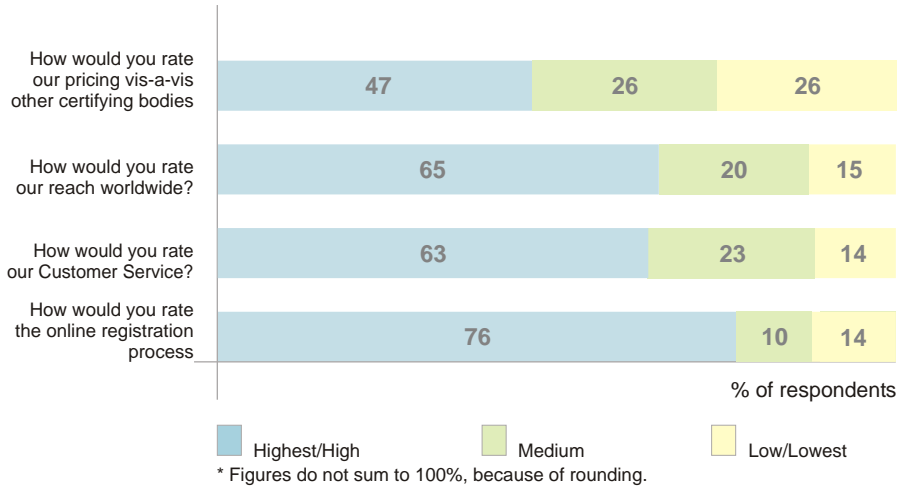

\* Figures do not sum to 100%, because of rounding.

More than 90% of the certified sample population believes that getting certified from QAI added value to their career and helped them in boosting confidence and self esteem and gaining recognition amongst the community while it helped about 70% in increasing their knowledge base. It also helped more than 50% to get a better job and 38% in a salary increment.

## Exhibit 2 How the Professionals rate the Software Certification Program

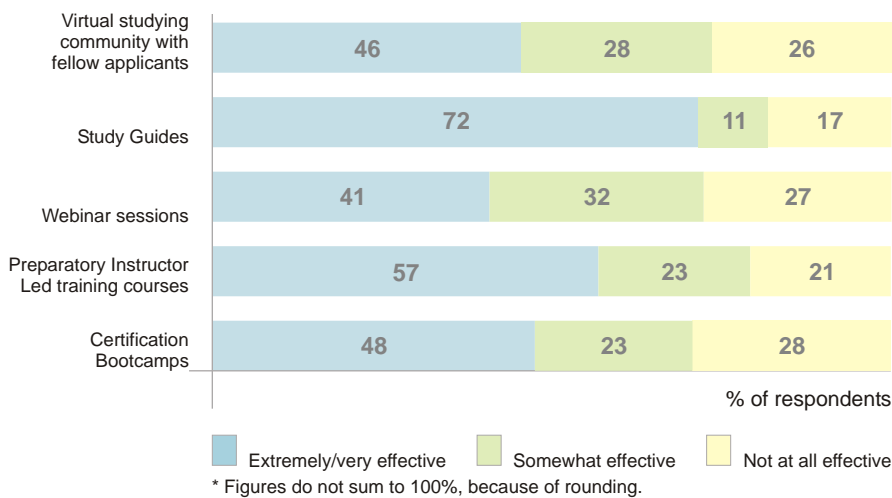

Majority are in favor of the Software Certifications online registration process, its customer service and its worldwide reach.

More than 85% of the certified sample population is in favor of our customer service, our online registration process and believe we have a favourable outreach as we are present in 135 countries across 6 continents. Also, about 70% of them believe that the certification examination fee is reasonable compared to other certifying bodies.

## Exhibit 3 How aspiring candidates prepare themselves

Majority prefer study guides and instructor led trainings to prepare for the examination.

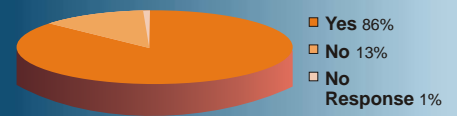

More than 80% of the certified sample population prefers study guides and Instructor led training as appropriate means of preparing for the examination. While around 70% prefer bootcamps,webinars and virtual communities.

## More Findings

### Exhibit 4

Do you think certification of competency is necessary for the profession?

### Exhibit 5

Are you a part of virtual communities of certified professionals?

### Exhibit 6

How would you rate the recertification process and ease?

### Exhibit 7

How would you rate our comprehensive Body of Knowledge vis-à-vis other Certification CBoKs?
